

OBAVIJEST KORISNICIMA TRANSPORTNOG SUSTAVA

Izgradnjom i puštanjem u rad magistralnog plinovoda Zabok – Lučko DN 700/75, stvoreni su tehnički preduvjeti za povećanje kapaciteta interkonekcije IMS Rogatec na iznos 1.049.117 kWh/h (GCV 25°/0°). Za vrijeme pokusnog rada novoizgrađenog plinovoda, a do ishoda uporabne dozvole, Plinacro će osim dosadašnjeg stalnog kapaciteta iznosa 322.118 kWh/h (GCV 25°/0°) korisnicima transportnog sustava omogućiti ugovaranje i korištenje prekidivog kapaciteta do iznosa 1.049.117 kWh/h (GCV 25°/0°) i to na sljedeći način.

Povećani kapacitet na IMS Rogatec, od sadašnjeg stalnog kapaciteta 322.118 kWh/h do iznosa 1.049.117 kWh/h, može se od dana 1.7.2026. godine ugovoriti kao prekidivi kapacitet na redovnim aukcijama prekidivih kapaciteta na aukcijskoj platformi PRISMA, a tako ugovoreni kapacitet moći će se nominirati i koristiti bez prekida osim u eventualnom slučaju zastoja tijekom pokusnog rada.

Naime, iznimno ako okolnosti pokusnog rada budu zahtijevale prekid transporta plina kroz novoizgrađeni plinovod Zabok – Lučko, korištenje kapaciteta interkonekcije bit će moguće do iznosa sadašnjeg stalnog kapaciteta (322.118 kWh/h), pri čemu će korisnici koji imaju ugovoreni stalni kapacitet na IMS Rogatec istog nesmetano koristiti.

Dobivanjem uporabne dozvole za novoizgrađeni plinovod, čije ishoda je u redovnom postupku, sav kapacitet do navedenog iznosa (1.049.117 kWh/h) nuditi će se kao stalni kapacitet, o čemu ćemo vas pravovremeno obavijestiti.

Za sve operative informacije korisnici transportnog sustava mogu se javiti Službi komercijalnog upravljanja na e-mail prodaja@plinacro.hr i transport@plinacro.hr.

NOTICE TO TRANSMISSION SYSTEM USERS

With the construction and commissioning of the gas pipeline Zabok – Lučko DN 700/75, technical preconditions have been created for increasing the capacity of the IMS Rogatec interconnection to the amount of 1,049,117 kWh/h (GCV 25°/0°).

During the trial operation of the newly constructed gas pipeline, and until the use permit is obtained, Plinacro will, in addition to the current firm capacity of 322,118 kWh/h (GCV 25°/0°), enable transmission system users to book and use interruptible capacity up to the amount of 1,049,117 kWh/h (GCV 25°/0°) as follows.

The increased capacity at IMS Rogatec, from the current firm capacity of 322,118 kWh/h to the amount of 1,049,117 kWh/h, can be booked as interruptible capacity at regular auctions of interruptible capacities on the PRISMA platform as of 1 July 2026, and such booked capacity can be nominated and used without interruption, except in the event of a possible downtime during the trial operation.

Namely, exceptionally if the circumstances of the trial operation require the interruption of gas transmission through the newly built Zabok – Lučko gas pipeline, the use of interconnection capacity will be possible up to the amount of the current firm capacity (322,118 kWh/h), whereby users who have booked firm capacity at IMS Rogatec will use it without interruptions.

By obtaining an use permit for the newly built gas pipeline, the acquisition of which is in the regular procedure, all capacity up to the specified amount (1,049,117 kWh/h) will be offered as firm capacity, of which we will inform you in a timely manner.

If you have any questions or need clarifications about this notice, please feel free to contact Commercial Management Department at prodaja@plinacro.hr and transport@plinacro.hr.
